

AU Accessibility Remediation

Comprehensive Scope & Deliverables for QA Testing (WCAG 2.2 AA)

Target: WCAG 2.2 Level AA compliance | **Sign-off:** Mid July 2026

1. VISUAL & HTML MARKUP REMEDIATION QA

- **Color Contrast Ratios:** Verify contrast ratios against WCAG 2.2 AA targets (minimum 4.5:1 for normal text, 3:1 for large text and UI components) across headers, inputs, promotion banners, ETA labels, body copy, and footer links.
- **ARIA & Labels:** Check presence of discernible ARIA label text on all social icons, product links, compare buttons, and interface elements lacking native text.
- **Touch Target Sizes:** Validate that all interactive controls have a touch-friendly dimensions of at least 44x44px.
- **Viewport Settings:** Verify that browser-level pinch-to-zoom is fully functional and user scalability restrictions (`user-scalable=no`) have been removed.
- **Carousel HTML Markup:** Confirm carousel component structures (Slick/Swiper) use correct semantic tags and avoid malformed list markup (e.g. resolve non-`li` structures within lists or orphaned list items).

2. ACCESSIBILITY & SCREEN READER TESTING

- **Keyboard Focus Management:** Validate logical tab sequence across page templates. Ensure focus remains constrained inside open modals/drawers (focus trap handling).
- **Landmark Structure:** Verify correct page regions (`header`, `main`, `nav`, `footer`) are navigable.
- **Windows NVDA Testing:** Manual screen reader pass verifying page readout during end-to-end user flows on Windows devices.
- **macOS/iOS VoiceOver Testing:** Manual screen reader pass on iPhone 14 Pro Max and Mac platforms across all critical journeys.

AU Accessibility Remediation

Comprehensive Scope & Deliverables for QA Testing (WCAG 2.2 AA)

3. TEMPLATE VERIFICATION & PERFORMANCE

All compliance testing must verify that core page templates maintain clean visual layouts and show **zero automated scanner failures**. Target templates:

- Homepage
- Product Listing Page (PLP)
- Product Detail Page (PDP)
- Search Results
- Checkout Journey
- My Account Area
- B2B Trade Portal
- Static & Content Pages

Core Web Vitals Requirement: Verify that performance remains within thresholds post-fixes: LCP < 2.5s, CLS < 0.1, INP < 200ms.

4. DEVICE & BROWSER TESTING MATRIX

Device Category	OS Version	Web Browser
Desktop PC (Windows)	Windows 11	Google Chrome, Microsoft Edge (latest)
MacBook Pro / iMac (Mac)	macOS Sonoma & Ventura	Apple Safari, Google Chrome (latest)
iPhone 13 mini & 14 Pro Max	iOS 18	Apple Safari (latest)
iPad Air (5th Gen)	iPadOS 17	Apple Safari (latest)
Samsung Galaxy S22 & S23 Ultra	Android 14	Google Chrome, Samsung Internet (latest)
Samsung Galaxy Tab S8	Android 13	Google Chrome (latest)

5. SCOPE BOUNDARIES

In-Scope QA Responsibilities

- Lighthouse Automated Reports
- NVDA & VoiceOver Manual Run Evidence
- Remediation Mapping Log
- Zero P1/P2 Bugs Sign-off
- Co-validation with Client/OD Auditors

Out-of-Scope (Not Delivery Partner QA)

- Auditing new brand refresh layouts
- Validating backend database transactions
- ERP (Celigo/NetSuite) internal workflows
- Authoring public Accessibility Statements
- US Store deployment (Phase 2)
