

AU Accessibility Remediation: QA Scope

WCAG 2.2 Level AA Front-End Remediation QA Verification Plan

Target: WCAG 2.2 Level AA compliance | **Audited Site:** globewest.com.au | **Platform:** Adobe Commerce (Magento 2)

PROJECT OVERVIEW & CONTEXT

This document establishes the **QA Tester Scope of Work** for the front-end accessibility remediation of the GlobeWest Australian (AU) store. The objective is to verify all remediation fixes based on the WCAG 2.2 Level AA Audit Report.

Strategic Goal: Achieve full compliance on the AU site before the US store fork in Phase 2, preventing duplicated front-end accessibility development cycles.

CONTACT INFORMATION

Overdose Digital Project Team:

- Jess Anticaglia (Sponsor) - jessica.a@overdose.digital
- Michelle Munro (Project Manager) - michelle@overdose.digital
- Alex Pape (Technical Lead) - alex@overdose.digital
- Shantelle Johnson (Design Lead) - shantelle@overdose.digital

Delivery Partner (MagnetolIT QA Team):

- Project Lead: TBC
- Technical Lead: TBC
- QA Accessibility Tester: TBC

QA EXECUTION FLOW

```
1. Setup & Analyze Inputs (Audit specifications & Lighthouse baseline scores)
  ↓
2. Environment Configuration (Staging: mcstaging2.globewest.com)
  ↓
3. Execute Page Template Audits (Automated scans & manual NVDA/VoiceOver runs)
  ↓
4. Log & Re-test Defects (Manage remediation logs & UAT sheets)
  ↓
5. Post-Fix Performance & Auditor Pass (Verify CWVs & support client verification)
  ↓
6. Final Sign-off & Delivery (Zero P1/P2 accessibility bugs)
```

VERIFICATION RULES & ACCESSIBILITY CRITERIA

Remediation Pillar	✓ Pass Condition	✗ Fail Condition
Color Contrast WCAG 1.4.3	Text & UI elements must hit contrast ratios of: • 4.5:1 for normal text • 3.0:1 for large text / UI elements	Headers, buttons, inputs, ETA spans, or footer text failing contrast checker tools.
ARIA & Labels WCAG 1.1.1 / 4.1.2	Discernible text name or <code>aria-label</code> attribute describing all interactive controls.	Empty links, buttons with SVG icons only and no label text.
Touch Target Sizing WCAG 2.5.8	All tap targets must have size/spacing of at least 44x44px .	Small mobile swatches, header navigation icons, or carousel links under 44px.
Viewport & Zoom WCAG 1.4.4	Users must be able to pinch-to-zoom on mobile devices.	Meta tags using <code>user-scalable=no</code> or setting max/min scales.
Carousel HTML DOM WCAG 1.3.1 / 4.1.1	Clean semantic layouts where list containers only enclose list items.	Slick/Swiper templates inserting direct <code>div</code> children within <code>ul</code> lists.

KEYBOARD NAVIGATION & FOCUS RULES

- **Logical Sequence:** Tab progression must follow a logical top-to-bottom, left-to-right visual layout order.
- **Visual Focus Outlines:** Every interactive element must display a high-contrast visual outline when focused.
- **Focus Trap Handling:** During active modal drawers (minicart, mobile nav, PLP filters, login drawer), focus must be locked inside the overlay. Pressing tab should cycle inside and not jump behind the background overlay.

PAGE TEMPLATES IN-SCOPE

- **Homepage:** Banners, promo widgets, main nav header.
- **Listing Page (PLP):** Filter checkboxes, grids, sorting dropdowns.
- **Detail Page (PDP):** Swatches, galleries, zoom, sizes, reviews.
- **Search Results Page:** Autocomplete panels, results grids.
- **Checkout Journey:** Cart forms, minicart, billing inputs.
- **My Account Area:** Customer dashboards, address books.
- **B2B Trade Portal:** Multi-step registrations, pricing grids.
- **Static Pages:** Showrooms, FAQs, Contact forms.

 BROWSER & DEVICE TESTING MATRICES

7.1 UI Testing Matrix (12 Layout Combinations):

#	Device Category	Operating System	Web Browser
1	MacBook Pro / iMac	macOS Ventura	Chrome (latest)
2	MacBook Pro / iMac	macOS Ventura	Safari (latest)
3	MacBook Pro / iMac	macOS Sonoma	Chrome (latest)
4	MacBook Pro / iMac	macOS Sonoma	Safari (latest)
5	Android Phone (S22)	Android 14	Chrome (latest)
6	Android Phone (S23 Ultra)	Android 14	Samsung Internet (latest)
7	iPhone 13 mini	iOS 18	Safari (latest)
8	iPhone 14 Pro Max	iOS 18	Safari (latest)
9	iPad Air (5th gen)	iPadOS 17	Safari (latest)
10	Android Tablet (Tab S8)	Android 13	Chrome (latest)
11	Windows PC	Windows 11	Chrome (latest)
12	Windows PC	Windows 11	Edge (latest)

7.2 Functionality & Journey Testing Matrix (3 Combinations):

#	Device Category	Operating System	Web Browser
1	MacBook Pro / iMac	macOS Sonoma	Chrome (latest)
2	iPhone 14 Pro Max	iOS 18	Safari (latest)
3	Samsung Galaxy S23 Ultra	Android 14	Chrome (latest)

**Note: Accessibility journey testing must be separately verified using NVDA on Windows 11 (Chrome/Edge), VoiceOver on macOS (Safari), and VoiceOver on iOS 18 (Safari).*

 QA DELIVERABLES & ARTIFACTS CHECKLIST

- **Remapping Log:** Spreadsheet indexing pages, fail codes, fixes, and re-tests.
- **Run Sheets:** Executed matrices for the 12 browser/device layout combinations.
- **Screen Reader Recordings:** Video/audio evidence of NVDA & VoiceOver runs.
- **Zero P1/P2 Bugs:** Validation report proving no critical/high issues are open.
- **Automated Reports:** Exported Lighthouse/axe-core pass logs.
- **CWV Scores:** Verification that LCP < 2.5s, CLS < 0.1, INP < 200ms are met.

AU Accessibility Remediation — QA Scope Boundaries

⚠️ SCOPE BOUNDARIES

IN-SCOPE QA DUTIES

- Code fixes verification on staging.
- Automated & manual accessibility testing.
- Device/Browser testing compliance.
- Performance metrics post-fixes.

OUT-OF-SCOPE (EXCLUDED)

- Testing Brand Refresh styles (OD).
- ERP (NetSuite) integration verification.
- Phase 2 US store builds & configurations.
- Writing the website's accessibility statement.

🐛 COMMON QA TROUBLESHOOTING

Observed QA Failure	Verification & Remediation Fix
No focus outline on buttons/links	Verify outline is visible. Ensure focus styles are not disabled via <code>outline: none</code> . <code>a:focus { outline: 3px solid #e0533c !important; outline-offset: 2px; }</code>
Tab focus escapes active modal drawer	Verify keyboard tab navigation is trapped. Ensure Javascript modal libraries catch keydown events and loop focus back to drawer elements.
Screen reader skips icon buttons	Ensure SVGs and icon-only anchors specify clear <code>aria-label</code> values (e.g. <code>aria-label="Search"</code>) to describe functionality.
Mobile pinch-to-zoom is locked	Verify mobile zoom behavior. Remove user-scalable limitations from layout viewport headers: <code><meta name="viewport" content="width=device-width, initial-scale=1.0"></code>
